

接口文档

地址：<http://ad09.tiaoshuimeishi.com/tencent/ad/user-action>

请求方式：POST

请声明数据请求类型和接收类型

Content-Type:application/json

Accept:application/json

请求参数：

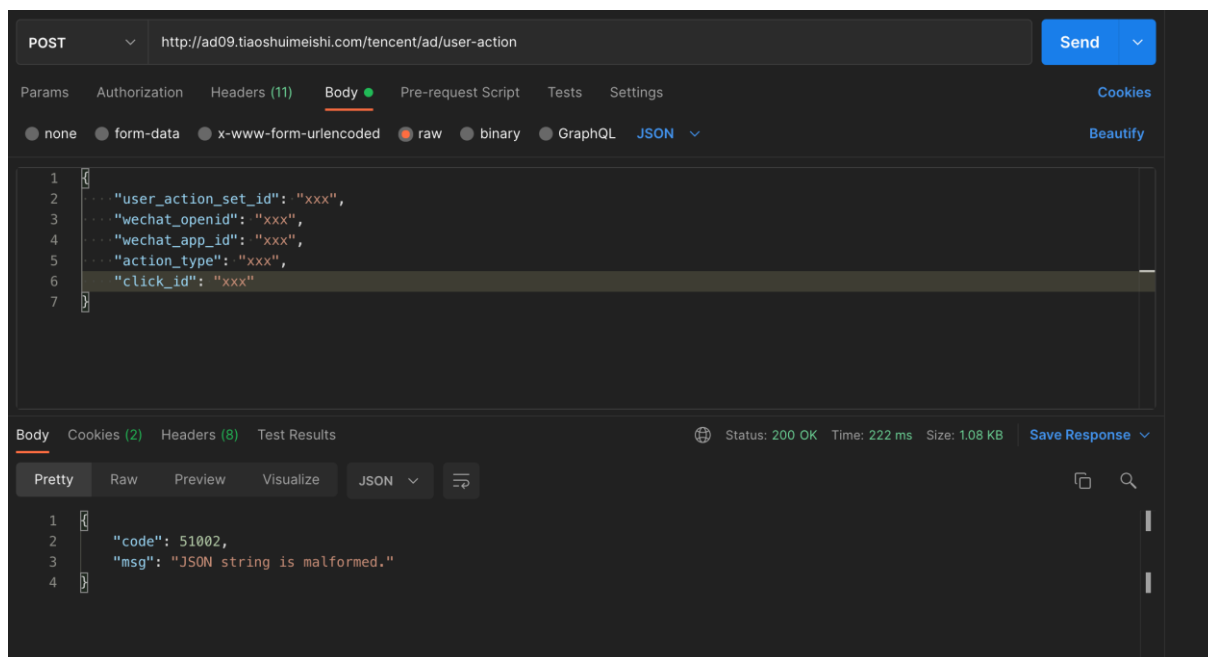

```
{  
    "user_action_set_id": "",  
    "wechat_openid": "",  
    "wechat_app_id": "",  
    "action_type": "",  
    "click_id": ""  
}
```

名称	类型	说明
user_action_set_id	integer	用户行为源 id（在 DMP 平台可以获得）
wechat_openid	string	微信小程序用户 Openid
wechat_app_id	string	微信小程序 APPID
action_type	string	行为类型， 注册：REGISTER 下单：COMPLETE_ORDER 预约：RESERVATION

action_time	integer	行为时间，格式：时间戳，单位：秒
click_id	string	点击 ID

响应代码：code = 0 表示成功，其他表示失败

请求示例：

The screenshot shows a REST client interface for a POST request to `http://ad09.tiaoshuimeishi.com/tencent/ad/user-action`. The request body is a JSON object with the following fields:

```
1 {
2   "user_action_set_id": "xxx",
3   "wechat_openid": "xxx",
4   "wechat_app_id": "xxx",
5   "action_type": "xxx",
6   "click_id": "xxx"
7 }
```

The response status is 200 OK, with a time of 222 ms and a size of 1.08 KB. The response body is a JSON object with the following fields:

```
1 {
2   "code": 51002,
3   "msg": "JSON string is malformed."
4 }
```
